## SUMMARY

Passionate and self-driven Web Developer with 1.5+ years of experience in building dynamic web applications using Laravel, Livewire, PHP, HTML, CSS, Bootstrap, and the MERN stack. Strong grasp of backend development, interactive component-based architecture, and RESTful APIs. Proven experience working with Hostinger's hPanel, cPanel, and version control systems like Git/GitHub. Started the development journey during BCA studies and grew into a key team member at Haxways Software. Dedicated to continuous learning and delivering pixel-perfect, performance-optimized web solutions.

---

## WORK EXPERIENCE

**Web Developer – Laravel, Livewire & MERN | Haxways Software**

2024 – Present

- Developed scalable Laravel applications and backend features.
- Built admin panels, authentication, and RESTful APIs.
- Implemented SEO optimization for dynamic web content.
- Worked on MERN stack applications (MongoDB, Express, React, Node).
- Managed CI/CD pipelines, deployment, and version control using Git/GitHub and Hostinger hPanel.

**Intern - Web Developer, Haxways Software Development Company**

6 Months in 2023

- Learned and contributed to real-world projects.
- Worked on CRUD operations, Blade templates, and MVC architecture.
- Assisted in developing backend logic and database interactions.
- Gained hands-on experience with Git/GitHub and team workflows.
- Collaborated with senior developers to understand best coding practices.

---

## TECHNICAL SKILLS

### Backend & Frameworks:

- PHP, Laravel, Eloquent ORM, RESTful APIs, MySQL, Livewire, Queue & Jobs, Caching

### Frontend Development:

- Intermediate in HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript (ES6+), React.js

### Database & Optimization:

- MySQL (Query optimization, indexing, joins, subqueries)
- MongoDB (CRUD, aggregation, indexing)

### DevOps & Tools:

- Git, GitHub, Docker (basic), Forge, Envoyer Currently learning CI/CD concepts and building simple GitHub Actions workflows to automate testing and deployment steps

## PROJECTS

### Buraq Cars | [visit Project](#)

Developed a responsive automotive listings website (buraq-cars.com) using Laravel, PHP, MySQL, with dynamic vehicle categories and smooth search/filter functionality.

Designed user-friendly, cross-device UI and implemented backend features for listings, vehicle details, and contact inquiries.

Handled secure form submissions, performance optimization, SEO, and deployment via Git/GitHub and Hostinger hPanel.

### CPIT Institute | [visit Project](#)

Developed CPIT (cpit.net.in) with dedicated dashboards for students and institute admin, enabling course tracking, certificate assignment, and student management.

Implemented secure authentication, role-based access, responsive UI, and optimized performance for smooth user experience.

### Taxi booking Software | [visit Project](#)

Developed a live taxi booking platform (anmolyatra.com) with a robust role-based system, enabling admins to assign roles and manage drivers effectively.

Implemented driver dashboards to view and accept bookings, and a PNR/token-based verification system for users to check booking status after booking confirmation.

Integrated secure authentication, dynamic UI, responsive design, and optimized performance for smooth user experience.

---

## EDUCATION

Maa Shakumbhari University, Saharanpur

2022-2025

**Bachelor of Computer Applications (BCA)**

Pursued BCA (2022-2025) at Maa Shakumbhari University, Saharanpur, while simultaneously gaining hands-on experience in backend development, Laravel, and modern web technologies through self-learning and active GitHub contributions.

---

## ADDITIONAL INFORMATION

- Technical Skills:** Comfortable working in both Linux (Ubuntu) and Windows environments, with hands-on experience in Git, GitHub, VS Code, XAMPP, Currently learning CI/CD concepts and building simple GitHub Actions workflows to automate testing and deployment steps.
- Languages:** English, Hindi
